

Healthy without Chemicals Seminar

Are you ready for the big one?

You are stuck at home without a car or access to medications for days. You get sick. What do you do? Learn to take care of yourself, your loved ones, and your clients. This seminar will teach you about the signs and symptoms, the point prescription and location, and the herbal treatment associated with colds, flu, allergies, asthma, and migraine/headaches using acupuncture, cupping and herbs. You will also learn how to stay healthy the natural way.

This two part seminar is designed so you not only get the theory, but also the demos and the practice you need to be able to start using the techniques right away.

About Nathalie Valkov PhD, L.Ac

Involved with the practice of Oriental Medicine since 1999, she has made it her life commitment to bring healthy alternatives to as many people as possible. Her skills are recognized worldwide, and she has patients in Europe, South America, Porto Rico and all over the United States. She has been invited to participate in intentional conferences on the integration of Traditional Medicines within our current biomedical system, as she is a world renowned expert in her field. She is also the author of health books such as "Cordyceps: Treating Diabetes, Cancer, and Other Illnesses" and "Healthy without Chemicals".
